

# Teachers on the Estuary

*a National Estuarine Research Reserve program*

**Narragansett Bay  
Research Reserve**

## **Teachers on the Estuary (TOTE)**

**August 8-10, 2017 at the**

**Narragansett Bay National Estuarine Research Reserve**

Immerse yourself in the beautiful setting of the Narragansett Bay Research Reserve to learn and witness first-hand the impacts of climate change and rising sea levels on salt marshes. Hear about current research and monitoring projects directly from our scientists and return to your classroom with local data to share this story with your students. This professional development workshop is designed for middle and high school science teachers.

Aligned with NGSS frameworks; explore coastal habitats and conduct field investigations; bring local and national data into your classroom; learn how to guide student investigations.

Workshop is FREE, including dorm-style lodging and meals on Prudence Island, RI, home of the Narragansett Bay Research Reserve.

*Space is limited. Applications will be accepted until June 9.*

*Contact Maureen Dewire for more information:*
