

July 9-12, 2018 at the Narragansett Bay National Estuarine Research Reserve on Prudence Island, RI

Immerse yourself in the beautiful setting of the Narragansett Bay Research Reserve to learn and witness first-hand the impacts of climate change and rising sea levels on salt marshes. Hear about current research and monitoring projects directly from our scientists and return to your classroom with local data to share this story with your students. This workshop is designed for middle and high school science teachers. Participants will be invited to return for a weekend curriculum-writing retreat the following spring.

- Explore coastal habitats and conduct field investigations
- Bring local and national data into your classroom
- Learn how to guide student investigations
- Aligned with NGSS frameworks

Workshop is FREE, including dorm-style lodging and meals on Prudence Island.

Register now as space is limited to 10 educators. Contact Maureen Dewire, Education Coordinator, at maureen@nberr.org or 401.683.1478 for any questions and to register.

Teachers on the Estuary (TOTE) is a program of the National Estuarine Research Reserve System.
